## **EXAMINER'S AMENDMENT**

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance:

The claims are allowable over the prior art of record because the prior art of record does not teach or suggest an image forming apparatus having a normal standby and a reduced power consumption mode comprising a first circuit that controls processing, a second circuit operable when the image forming apparatus is in the reduced power consumption mode; detecting device that detects the status of the image forming apparatus; wherein the first circuit responds to an input request when the image forming device is in the normal standby mode but not when it is in the reduced power consumption mode wherein the second circuit response to an input request when the image forming apparatus is in the reduced power consumption mode.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hirano, Miyazaki et al., Okazawa, and Yamada teach pertinent prior art.
